

# SLICER BLADES INVOLUTE SHAPE

ASTOR produces Slicer blades for machines of well-known manufacturers, such as WEBER, FORMAX, SCHINDLER & WAGNER, THURNE, TREIF etc.

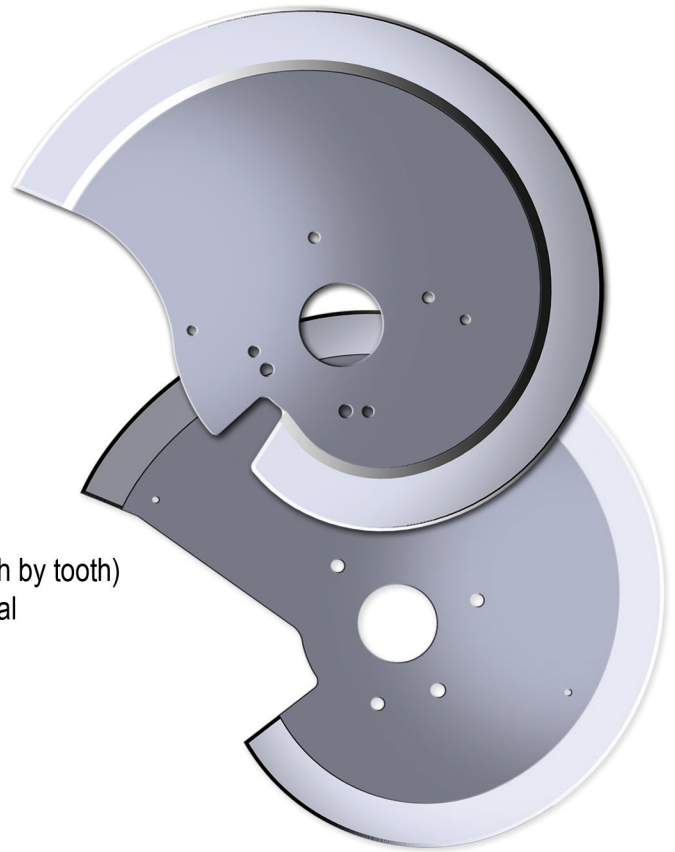

Its product range includes various custom types of serration and edge geometries (straight, convex, concave, fine and special serration) as well as different coatings for all kinds of applications.

## Our quality features:

- High accuracy of run-out ( $\pm 0.1$  mm) and contour (0.5-1.0 mm)
- Precise cutting and running properties
- Top cutting quality also for challenging products
- Substantially improved lifetime
- Easy sharpening compared with bimetal edges, thus allowing to reproduce the edge more quickly

## Our Service:

- Regrinding service including coating and serration (tooth by tooth)
- Maintenance of allegedly defective blades after appraisal

## ASTOR is a partner for development!

- Innovations and further development of products according to your requirements, based on our experience and technological capabilities
- Custom shaping of edges with a great variety of angles and serration, also beyond standard types
